CHROMATOGRAPHIA

An International Journal for Rapid Communication in Chromatography and Associated Techniques

Scientific Editors: **T.A. Berger**, *Hewlett-Packard Co., 2850 Centerville Road, Wilmington, DE 19808, USA* and **H. Engelhardt**, *Angewandte Physikalische Chemie, Universität, D-66041 Saarbrücken, Germany*
Technical Editors: **E.R. Adlard**, *Delryn, Vicarage Lane, Burton, South Wirral L64 5TJ, UK* and **R. Stock**, *23 Highbury Road, Keyworth, Nottinghamshire NG12 5JB, UK*
Special Editor: **L.S. Ettre**, *PO Box 2175, Belden Avenue Station, Norwalk, CT 06852, USA*

Audience: Analytical Chemists.

AIMS AND SCOPE
Present-day technology makes necessary the rapid exchange of information among professionals in the field of chromatography. Because of the difficulty in solving certain analytical problems quickly and economically using only one of the chromatographic methods, the combined use of varied techniques, such as gas chromatography and mass spectroscopy, yields more exact results. *Chromatographia* is a monthly, international journal that meets the vital demand for the quick spread of accurate, concise information concerning chromatography and related fields. Modern analytical problems place such great demands on the accuracy, sensitivity, speed and economy of the instruments that they can only be solved by close cooperation between theorists, users and instrument manufacturers, and to this end *Chromatographia* permits the rapid exchange ofinformation.
